

# Taking back and recycling of **transport packaging**

Leave it to Interseroh – the number 1 in the market –  
nationwide, efficient and sustainable

# Nationwide recycling with the know-how from the market leader

## We turn recycling into your competitive advantage

**Cardboard, film or foil, wooden pallets, expanded polystyrene (EPS) and filament tape** – transport packaging is essential to ensure your products arrive safely at your customers in trade, manufacturing and retail. However, anyone placing packaging on the market is required by law to take the packaging back and recycle it to save resources.

**For over 25 years, Interseroh has operated sophisticated take-back and recycling solutions across Germany for materials from used transport packaging.**

Partnering with Interseroh as your system operator offers you a straightforward, long-term solution to meeting your legal obligations.

As a manufacturer and distributor, you simply report your transport packaging for disposal in our system.

You no longer need to worry about complex logistics processes and time-consuming administration – and your customers can look forward to a free pick-up service.

**Every year, we coordinate around two million collections in Germany for more than 4,000 customers from over 20 industries.** As the first provider of transport packaging take-back services and now the market leader, Interseroh sets standards in terms of quality, customer focus and innovative recycling technologies.

**Pay for what you use rather than ‘one size fits all’**

**We charge a fair price for a quality service:** We only bill you for the packaging volumes that you actually place on the market. We don't use flat fee models that are based on your sales figures and have nothing to do with the service that we actually provide.

**Sustainable recycling instead of hot air**

The recovery that is specified by the German Packaging Act for the packaging that is taken back can be energy recovery – which means incineration to generate energy. **At Interseroh, high-quality recycling is used to treat your packaging and keep it in the resource loop.**

# Efficient and highly customer-focused

## A reliable service drawing on a strong network

Next to ALBA, Interseroh is one brand under the umbrella of the ALBA Group. The ALBA Group is one of the leading recycling and environmental services companies as well as raw material providers worldwide. As an Interseroh customer, you benefit from efficient solutions for closing product, material and logistics loops.

**Wherever your used transport packaging accrues – we're there:** With an extensive recycling and logistics network consisting of around 600 certified waste management partners, Interseroh organises regular collections and resource-friendly recycling for over 100,000 commercial waste generation points. This also includes completely emptied containers – i.e. containers made from plastic, aluminium or other metals – even if these were used to hold hazardous goods.

You simply tell us the type and volume of your transport packaging and let your customers know you are using our system: we then organise everything else directly with your customers, who can be sure of enjoying a trouble-free service anywhere in Germany.

## Individual solutions as standard

### Are you using custom packaging that features unusual materials or comes in special shapes and sizes?

We look forward to the challenge and will be happy to develop your optimum take-back solution.

# Make your mark on sustainability

## Quality that you can rely on

We take back your used packaging – reliably. This promise is backed by our end-to-end quality management system. Our integrated management system safeguards quality, environmental, energy, labour and health standards, is certified to DIN EN ISO 9001:2015, DIN EN ISO 14001:2015, DIN EN ISO 50001 and BS OHSAS 18001:2007, and is verified by the Waste Management Company Quality Mark.

## Expert handling based on clear guidelines

We provide a transparent documentation that proves that the taking back and recycling of your packaging is compliant with the German Packaging Act. We view it as our mission to use recycling to keep transport packaging in the loop – rather than looking for loopholes in the law.

By registering your packaging, which we confirm with our recycling certificate, you can prove to your customers that you are participating in the system. Our service provides you with maximum support in fulfilling your legal obligations.

## A visible commitment to the environment: resources SAVED by recycling

With Interseroh, you make an active contribution to protecting the environment and climate, helping to relieve the long-term burden on future generations. Around 30.2 million tonnes of primary resources were saved in 2017 alone thanks to the recycling work carried out by ALBA Group. Your individual resource protection certificate documents your company's own contribution to the primary resource savings achieved by our recycling activities.
